

SVIVE™

**PROTEUS
GAMING MOUSE**
READY TO PLAY

Quick Guide

Detachable side panels

The mouse has two sets of side panels. The different panels are detachable and held in place by magnets. Find the best ergonomic solution for your hand.

11 modes for RGB lighting

The RGB lighting can be configured in 11 different backlight modes. You can easily change to your personal style by pressing the Scroll Wheel and the Back Button (on left side of mouse) simultaneously.

Software

To get the full potential of this mouse it also comes with a software. You can fully customize the mouse buttons and settings, the RGB lighting, and the sensor resolution. Using the software you can also configure your personalized macros.
